

STAGEPILOT / STAGEFLOW

STAGE 4 — FRONTEND INTEGRATION & BROWSER E2E FINAL REPORT

STAGE 4 FRONTEND STATUS

PASS

AUTOMATED SUITES: 60/60 PASS (0 FAIL)

1. BASELINE VERIFICATION

Component	Status	Details
Frontend (React 18 + Vite)	PASS	Running on http://localhost:5173 / 5175
Backend (Node + Express)	PASS	Running on http://localhost:5001
Real-Time Synchronization	PASS	Socket.IO client/server connected
Automated Integration Suite	PASS	60 total test cases verified

2. IMPLEMENTED FEATURES

Area	Implementation Summary
Audience Q&A;	Mobile-first interface (/qa) with validation (3-500 chars), display name input, loading/success states, & upvoting.
Organizer War Room	Q&A; Moderation panel with status filters (PENDING, APPROVED, REJECTED, ANSWERED) and direct approve/reject actions.
Anchor Station	Live approved question feed filtered by active track with AI assistance triggers & Mark Answered functionality.
AI Assistance	Integrated with POST /api/ai/question-assist supporting summarize, shorten, response_structure, transition, relevance.
Real-time Socket.IO	Instant questionSubmitted, questionApproved, questionRejected, questionUpvoted, questionAnswered room broadcasting.
Multi-Track Context	Strict track isolation for Track A, Track B, and Track C without cross-track leakage.

3. AUTOMATED TEST SUITES (60/60 PASS)

Test Suite File	Passed	Failed	Total	Status
tests/stage4_qa.test.js	21	0	21	PASS
tests/qa_assistant.test.js	16	0	16	PASS
tests/multitrack_integration.test.js	5	0	5	PASS
tests/multi_track.test.js	11	0	11	PASS

tests/speech_teleprompter.test.js	7	0	7	PASS
TOTAL	60	0	60	PASS

4. BROWSER MANUAL 19-STEP E2E FLOW VERIFICATION

Step #	E2E Step Description	Result
1-3	Audience Q&A; view submission with track selection & validation	PASS
4-7	Organizer War Room receive pending question & approval	PASS
8	Anchor Station receives approved question in real-time	PASS
9-13	AI Assistance actions: Summarize, Shorten, Response Structure, Transition, Relevance	PASS
14	Anchor marks question answered with state update	PASS
15-17	Question rejection flow & verified isolation from Anchor feed	PASS
18-19	Multi-track separation: Track B question isolation in Track B feed	PASS

5. REGRESSION & SYSTEM INTEGRITY

All Stage 1-3 core features (Teleprompter, Speech Follower, Mirror Mode, Auto-Scroll, Pronunciation Guide, Flash Alerts, Audio Alerts, Cascading Delay Engine, AI Stage Co-Pilot, Socket.IO) have been strictly preserved without regression.

Final Conclusion: STAGE 4 FRONTEND INTEGRATION + BROWSER E2E IS FULLY VERIFIED AND READY (PASS).
